### *What is CAM?*

#### *What is CAM?*

CAM is a group of diverse medical and health care systems, practices, and products that are not presently considered to be part of conventional medicine.

Complementary medicine is used **together with** conventional medicine, and alternative medicine is used **in place of** conventional medicine.

Some health care providers practice both CAM and conventional medicine. The list of what is considered to be CAM changes continually as those therapies that are proven to be safe and effective become adopted into conventional health care and as new approaches to health care emerge.

For more about these terms, see the NCCAM fact sheet "[Click here.](#)"

**Schedule your Aromatherapy CAM private session and learn how you can blend conventional with complementary medicine to enjoy your best state of health and wellness.**

**Listen to What Others Say:**

*“Beatrice has a wall full of degrees and certifications in fields such as Reiki, Theta DNA and Aromatherapy and she specializes in Massage Therapy for physical ailments. She has had **success in helping stroke victims** recover from facial paralysis which I found impressive. I always saw that as a permanent condition but the nerve and muscle damage can be repaired or retrained.*

*I’ll confess to not knowing much about exactly what Beatrice does but I can tell you she knows what she is doing. She is an intelligent and articulate woman who speaks with confidence and **I’m impressed with her ideas on healing and alternative medicine.** I was most intrigued by what I learned about DNA Theta Healing but you can get Reiki and Massage treatments as well. **Theta Healing may hold some promise for my autistic son** and we’re exploring ways she can help us with his condition.” [www.jamaicamax.com](http://www.jamaicamax.com)*

**Healings Experiences at Sunset Heal** -- At Sunset Heal we have testimonials from many clients who have experienced amazing results from the Sunset Heal Spa treatments. Those clients include individuals suffering from: cancer, epilepsy, neurological disorders, fibromyalgia and a host of other theoretically incurable diseases.
